## PROFILE

Motivated and detail-oriented software developer with hands-on experience building full-stack applications and management systems. Skilled in MERN stack (MongoDB, Express, React, Node.js), Jetpack Compose with Room Database, and PHP/MySQL development. Demonstrated ability to design and implement real-world projects including a healthcare and school management system, hotel booking system, and a Digi-Farm platform. Strong foundation in database design, API integration, and frontend frameworks such as Material UI. Adept at problem-solving, debugging, and collaborating in team-based projects. Passionate about continuous learning and applying new technologies to deliver practical, user-focused solutions.
